Summary

Computer Science undergraduate at **NIT Patna** with **9.72/10 CGPA** and experience across **Airbnb**, **Oracle**, and **IIT Ropar**. Software Engineer / SDE-1 focused on **Java/Python backend development**, REST APIs, authentication, database-backed systems, request validation, caching, and cloud-native deployment. Strong foundation in **Data Structures and Algorithms using Java**, OOP, DBMS, Operating Systems, Computer Networks, and System Design.

Education

National Institute of Technology, Patna *Aug 2022 – May 2026*
Bachelor of Technology in Computer Science and Engineering **(CGPA: 9.72/10)** *Bihar, India*

Experience

Airbnb *Aug 2026 – Present*
Software Engineer (Contracted via Altimetrik) – Payments Risk and Alerting *Bengaluru, India*

- Working with the Payments Risk and Alerting team on **fraud-detection model** tuning and **log standardization** across payment services.
- Contributing to **alert API** integration and centralized monitoring/dashboard tooling for real-time payment-risk visibility.

Oracle *Jan 2026 – July 2026*
Intern – Cloud Infrastructure and DevOps, Cloud Native SBC *Gurugram, India*

- Improved **cnsbctl/CLI Proxy** tooling with recursive **XML** pruning, schema validation, API-path cleanup, and configurable **CA certificate** paths, cutting setup effort **20–35%**; hardened request handling with raw-path rejection, duplicate-parameter checks, and argument sanitization across **8+** ACLI command groups.
- Supported **Kubernetes/OpenShift** deployment workflows using **Helm** values/schema updates, RBAC/JWKS gating, **Prometheus/Thanos** telemetry hooks, and KEDA autoscaling readiness.

IIT Ropar *May 2025 – Jul 2025*
Software Development Intern – Full Stack and AI-Enabled Systems *Remote*

- Built a student support platform with **React** frontend, **Node.js** backend, Python-based recommendation workflows, and an LLM-supported chatbot, serving **300+ students** across **5+** departments, with **REST APIs**, JWT authentication, and role-aware modules.
- Streamlined student guidance and query-support flows, improving engagement by **15%**, reducing drop-off by **20%**, and accelerating ticket resolution by **30%**.

Skills

- **Languages:** Java, Python, JavaScript, SQL, C, Bash, XML
- **Backend Development:** REST APIs, HTTP APIs, Node.js, Express.js, FastAPI, JWT Authentication, RBAC, Request Validation, CLI Tooling, API Smoke Testing
- **Databases and Caching:** MySQL, MongoDB, JDBC, SQL Migrations, Repository Pattern, TTL Caching, Query Design
- **Cloud and Tools:** Docker, Kubernetes, OpenShift, Helm, KEDA, Prometheus, Thanos, Linux, Git, CI/CD
- **Core CS:** Data Structures and Algorithms **(Java)**, OOP, DBMS, Operating Systems, Computer Networks, Multithreading, System Design, Low-Level Design
- **Additional:** React, HTML, CSS, Tailwind CSS

Projects

Core Banking Engine *github/Banking-System | 2025*

- Architected a layered **Java** banking engine around the Bank aggregate, supporting **3** account types, **4** transaction flows, audit trails, and asynchronous queue-backed execution, with token-secured **HTTP APIs** for health, metrics, account discovery/maintenance, and transaction queuing.
- Implemented pluggable **JDBC**/in-memory persistence, SQL migrations, repository abstraction, and **2** TTL cache scopes for account snapshots and derived balances.

European Power Fair Value Forecasting Pipeline *github/euro-power | Jun 2026 – Present*

- Engineered an end-to-end **Python** pipeline for DE-LU power price forecasting with Energy-Charts ingestion, JSON caching, UTC/DST-safe cleaning, feature engineering, validation, and automated reporting.
- Trained Ridge and **HistGradient Boosting** regressor models on lagged price, weather, and load features, reducing 2025 OOS MAE from **32.83** to **15.75 EUR/MWh**; integrated LLM QA via **Groq/OpenAI** APIs.

Awards and Achievements

- **LeetCode Knight:** Top **5.5%** globally with peak rating **1864**; solved DSA problems primarily in **Java** *leetcode*
- **CodeChef:** Rating **1736**; ranked 87th in Challenge 197 and 231st in Challenge 186 *codechef*
- **USACO Guide Contributor:** Authored **Java** solutions for the competitive programming guide *github/usaco*
- **JPMorgan Chase Code for Good 2025:** Built NGO platform for patient tracking, attendance, care allocation, and SMS alerts *certificate*
- **NTSE Scholar:** Awarded national scholarship for academic excellence *2020 – Present*
